TARGETS: Silver Mountain Electronic targets will be used for all matches. Scorers are required to watch all slow fire shots go into the target using their spotting scopes. Rapid fire, scorers watch the firer and confirm that 10 shots were fired in the allotted time period.

If a scorer watches a bullet enter the target of their shooter during a slow fire match and no indication on the target is given, grant the firer another shot. Be sure to check with scorers of adjacent targets to rule out a crossfire.

If during a rapid fire string the scorer validates that 10 shots were fired but 9 or less shots registered the firer is given the option to re-fire the string.

Scoring on electronic targets requires more attention than on conventional targets. We would not grant a shooter a free shot if they crossfired on conventional targets, we should not do the same on electronic targets.
